Me

Full stack web developer and recent college graduate. I received my Bachelors in Government and International Politics from George Mason University in the fall of 2018. In 2021 I completed The George Washington University Full Stack Web Development Bootcamp as one of the top students. My commitment to hard work and my desire for continued learning have brought me success so far, and I am excited to my journey as a developer.

Skills

JavaScript, React, Node, Express, HTML, CSS, MongoDB, mongoose, Bootstrap, ES6, REST APIs,

Projects

POCKET TRADER

Deployed: <https://pocket-traders.herokuapp.com>

Code: <https://github.com/Bgallag5/pocketTrader>

PocketTrader is a MERN full-stack application that has users "purchase" and manage their own pokemon teams. On this project I worked as the lead front-end developer, as well as wrote the back-end code for user login/authentication. Built with React, Express, MongoDB, Node, GraphQL, and the Pokemon API.

MOVIE BOX

Deployed: <https://fierce-plateau-48530.herokuapp.com/movies/login>

Code: https://github.com/Bgallag5/Movie_Box

Movie Box is a full CRUD API movie database application. Users can search for any movie currently in our database to find all types of information about that movie. Users can also save movies as their "favorites", leave their own reviews, and read other user's reviews. Built with MySQL, JavaScript, Node, Express, CSS, Handlebars, and Bootstrap.

WEATHER FORECAST APP

Deployed: <https://sheltered-ravine-61938.herokuapp.com/>

Code: <https://github.com/Bgallag5/react-weather-app>

A simple React weather forecast application that shows the current and five-day weather for the city you search. Utilizes React state and local storage to save and display past searches as quick actions. Built with React, JavaScript, Bulma, and the Open Weather API.
